

Amraj Koonar

236-518-6264 | Burnaby, BC | ask36@sfu.ca | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, HTML/CSS, Java, Python, C, C++, SQL (PostgreSQL), GraphQL

Frameworks: React.js, Next.js, Node.js, ExpressJs, Socket.io, Spring Boot, Vue.js, Tailwind CSS

Developer Tools: Docker, AWS, MongoDB, Cypress, Git, GitHub, Mocha, Vite

Transferable Skills: Problem-solving, teamwork, communication, time management, adaptability

PERSONAL PROJECTS

DeepPhishing | *Next.js, React, Tailwind CSS, Shadcn/ui, OpenAI API, JavaScript* Jan. – April 2025

- Built a cybersecurity tool that detects phishing attempts using AI-powered email and file analysis.
- Integrated multiple RESTful APIs to detect malware using URL, file, and email scanning tools.
- Followed the full SDLC in an Agile team to develop and deploy security features using a CI/CD pipeline with automated testing, staging, and user-driven iteration on Vercel.

FoodConnect | *React, TypeScript, Tailwind CSS, ExpressJs, PostgreSQL, AWS* Jan. – April 2025

- Developed an online donation platform connecting food donors and recipients, featuring a marketplace.
- Led front-end design to develop a professional UI that follows usability heuristics for clarity and easy navigation.
- Integrated a secure login/signup system with role-based access for donors and recipients.

SFU Marketplace | *Next.js, React, JavaScript, Tailwind CSS, JWT Auth* Sept. 2025 – Present

- Built a marketplace for SFU students with SFU email sign-up and JWT based authentication on Supabase.
- Designed a modern interface with GSAP powered animations and SFU brand palette for a professional experience.
- Applied the full SDLC in an Agile team structure to plan, develop, test, and deploy new features.

SportoQuiz | *Next.js, React, TypeScript, Tailwind CSS, OpenAI API* Apr. – Aug 2025

- Developed a sports trivia platform with themed quizzes and a real-time leaderboard for top scorers.
- Utilized OpenAI API for dynamically generating questions using player data fetched from the balldontlie API.
- Implemented a CI/CD workflow to ensure fast, consistent updates across development and production.

EXPERIENCE

Web Developer Sept. 2025 – Present

SFU Computing Science Student Society Burnaby, BC

- Collaborated with the W3 Committee to define the websites architecture, user flow, and overall design strategy.
- Designed and developed the new homepage for the CSSS website, enhancing user experience for 2,000+ students.

SFU Computer Science Peer Tutor Dec. 2024 – Present

Simon Fraser University Burnaby, BC

- Improved communication by helping students grasp recursion, dynamic programming, and other complex topics.
- Guided students in debugging and explained fundamental concepts in Python, Java, and C++.

Courtesy Clerk July 2022 – Nov. 2023

Real Canadian Superstore Burnaby, BC

- Managed multiple tasks efficiently in a fast-paced environment, showcasing communication and adaptability.
- Strengthened problem-solving, critical thinking and teamwork by helping customers and streamlining daily tasks.

RELEVANT COURSEWORK

CMPT 276 - Introduction to Software Engineering

- Integrated and applied the Software Development Life Cycle (SDLC) with a focus on Agile methodologies.
- Practiced team collaboration using version control, code reviews, and CI/CD workflows.
- Utilized RESTful APIs in team projects, handling data exchange and endpoint consumption in full-stack projects.

CMPT 225 - Data Structures & Programming

- Implemented and analyzed linked lists, stacks, queues, trees, AVL trees, and hash maps.
- Practiced object-oriented design, memory management, and debugging in C++.

EDUCATION

Simon Fraser University | BSc Dean's Honour Roll in Computing Science Sept. 2022 – Present

Recipient of the SFU Computing Science Undergraduate Student Society Award valued at \$3200.
